If you use BM70, when you do EDIT the UI setting, you need to select the Beacon option.

www.microchip.com/BM70

If you use RN4870, there is an ASCII interface for you to enable and set Beacon contents.

www.microchip.com/RN4870

BM70 and RN4870 are the same module with different firmware. Who is your disti FAE, please ask him to talk to me. I will show him how to support you for Beacon.

Martin
