FAE 的回覆說: BT spec. 似乎沒有定義 BLE 有 Link back 弁 Link back 的弁銑 酋 BT Classic, 如 A2DP/ SPP etc.

僅能透過類似方式達到目的:

做法1: 發起標準掃描 Scan 0x16, 對特定 BLE MAC or Device Name 發起

LE_Create_connection(0x17),

做法2: BLE 裝置發起 reconnect, 前提得先知道 Peer MAC address; 在此狀態下 裝置發的廣播是有限制的.

建議您來參加 TW Masters BT 的課程,
